CISA: Certified Information Systems Auditor

Congratulations on successfully completing the Certified Information Systems Auditor (CISA) course! This course provided a comprehensive understanding of Information Systems (IS) auditing, covering ISACA's five core domains essential for the CISA exam. You've gained expertise in IS auditing standards, governance, IT management, and the lifecycle of information systems, from acquisition to operations. Through practical scenarios, you've applied risk management, control assessments, and compliance practices. You've also explored emerging technologies like cloud computing and virtualization, preparing you to excel in both the CISA exam and your role as an IS auditor.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
